

Has your business got the Digital Edge?

Make better use of your time with clever cloud accounting solutions.

At Roberts Nathan we have developed a **digital accounting platform** that will allow you spend more time developing and running your business and less time on back office accounting administration. Our accounting platform utilises the latest available cloud accounting applications to provide you with real-time insight into the dynamics of your business.

THE CLOUD AND “CLOUD ACCOUNTING”

Cloud computing is simply using the internet to access software and storage, rather than physically installing it on a computer. Cloud accounting is also known as “online” or “digital accounting.” While the software is installed on your computer it runs on remote servers, which you can access using your web browser. This makes data and software accessible online anytime, anywhere, from any device. This means you can access your accounting information whenever you like from where ever you want.

Multiple Users

Access Anywhere

Saves Time

Customised Reporting

Reduced IT & Software Costs

Bank-level Data Security

Improved Cash Flow

24/7 Data Backup

THE BENEFITS OF GOING DIGITAL

Our platform is, easy-to-use, secure and utilises artificial intelligence to enable you to:

- Access key financial information as soon as you need it
- Track revenues, cashflows and key performance metrics in real time
- Create more efficient record-keeping processes
- Access financial and performance information online, or on-the-go
- Sector specific add-ons and applications allow you to integrate other digital platforms to your accounts
- Collaborate with your accountant and/or advisors

Our digital accounting software will drive faster responses and allow you to control your business from wherever you are.

HOW WE CAN HELP

We provide businesses with an end-to-end accounting solution that includes:

Software review and implementation

We help you review and implement the accounting software and related applications to suit your business needs.

Training and support

We will train you and your team and support you through all stages of the digital accounting implementation process and beyond.

Management information and reporting

Our digital platform will enable you generate the reports you need to monitor and run your business. Our team of experienced business advisors will provide insight and advice on all aspects of your business.

Outsourced finance director

As a professional services firm we have built up a wealth of knowledge and experience across a range of sectors and are available to assist you and your business.

OUR DIGITAL ACCOUNTING TEAM

We have built up significant experience in leveraging the latest technology, coupled with years of tax and business advisory experience.
